

Jayam Shanmukha Shivanvitha

B.E. in Computer Science & Engineering
BMS College of Engineering, Bengaluru, Karnataka
CGPA: **9.88 / 10** (Till III Semester)
Phone: +91-6304177463 Email: jayamshanmukha.cs4@bmsce.ac.in

Profiles

GitHub: shivanvithajayam
LinkedIn: shivanvithajayam

Skills

Languages: C, C++, Java, Python
Frameworks: React, Next.js, Flutter, JavaFX
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, GitHub, VS Code, Android Studio
Cloud/Backend: Firebase, Supabase
Operating Systems: Linux, Windows

Coursework

Data Structures and Algorithms | Computer Organization & Architecture | Object-Oriented Programming | Operating Systems | Database Management Systems

Education

2024–2028
B.E. in Computer Science and Engineering
BMS College of Engineering | CGPA: 9.88 / 10 (Till III Semester)

2022–2024
Intermediate
Narayana Junior College, Anantapur | Percentage: 98%

2021–2022
High School
Sri Chaitanya Techno School | Percentage: 96%

Projects

Sep 2025 – Jan 2026
BloodLine – Blood Bank Management System *Full Stack Web Development*
Developed a full-stack blood bank management system using Next.js, React, TypeScript, PostgreSQL, and Supabase to streamline donor, patient, and blood inventory management. Implemented secure donor and patient management, real-time blood inventory tracking, blood cross-matching, inter-blood bank blood request and transfer workflows, role-based access control, real-time notifications, and interactive dashboards. Deployed the application on Vercel.

Dec 2025
Fake App Detection – Android Security Application *Android | Django | Python*
Developed an Android application with a Django backend to detect fake or malicious applications using app metadata, permission analysis, publisher verification, icon hashing, and user ratings. Designed and implemented an evidence-based fraud risk scoring system to identify suspicious applications and present explainable detection results.

Mar 2026 – May 2026
ShareBite – Surplus Food Donation and Management System *Flutter | Firebase*
Developed a Flutter and Firebase-based mobile application to connect food donors with nearby NGOs for efficient surplus food distribution. Implemented Firebase Authentication, real-time donation management, NGO acceptance/rejection workflows, live donation status tracking, location-based NGO matching, donation history, and push notifications to streamline donation coordination and reduce food waste.

Extracurricular Activities

IEEE Computer Society, BMSCE: Organizing Committee member for technical events.
Pentagram: Member, Mathematical Society of BMSCE.
FAC (Fine Arts Club): Core Committee member.
